

Please do not give LPFM stations priority over other FM translator services. Our local K-LOVE services our local area with news and important community events we otherwise would not hear about. Our locally supported K-love offers inspiration, positive motivation and ideas on how to make ourselves, others and the community better. K-love offers hope and directions for help to people who really need it. K-love cares much more than welfare, and helps us to be better, productive citizens. This positive programing would be lost if a LPFM replaced our local transmitter. Locally supported stations provide much more service without commercial advertising because they care enough to devote all their air-time to the public... not make money with marketing ads to sell stuff. Support those who care about the public good, not making money. Thank you.
